Statistics for the Health Sciences: A Non-Mathematical Introduction Christine Dancey, John Reidy, Richard Rowe

Statistics for the Health Sciences is a highly readable and accessible textbook on understanding statistics for the health sciences, both conceptually and via the SPSS programme. The authors give clear explanations of the concepts underlying statistical analyses and descriptions of how these analyses are applied in health science research without complex maths formulae.

The textbook takes students from the basics of research design, hypothesis testing and descriptive statistical techniques through to more advanced inferential statistical tests that health science students are likely to encounter. The strengths and weaknesses of different techniques are critically appraised throughout, and the authors emphasise how they may be used both in research and to inform best practice care in health settings.

Exercises and tips throughout the book allow students to practice using SPSS. The companion website provides further practical experience of conducting statistical analyses. Features include:

- multiple choice questions for both student and lecturer use

- full Powerpoint slides for lecturers
- practical exercises using SPSS
- additional practical exercises using SAS and R

This is an essential textbook for students studying beginner and intermediate level statistics across the health sciences.

From reader reviews:

Adam Rucks:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each guide has different aim or maybe goal; it means that reserve has different type. Some people sense enjoy to spend their time to read a book. These are reading whatever they consider because their hobby is usually reading a book. What about the person who don't like reading a book? Sometime, man feel need book once they found difficult problem or even exercise. Well, probably you will want this Statistics for the Health Sciences: A Non-Mathematical Introduction.

Starr Place:

What do you about book? It is not important to you? Or just adding material when you want something to explain what the one you have problem? How about your time? Or are you busy person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? All people has many questions above. They must answer that question because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need this particular Statistics for the Health Sciences: A Non-Mathematical Introduction to read.

Richard Eby:

Nowadays reading books are more than want or need but also get a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The details you get based on what kind of reserve you read, if you want send more knowledge just go with knowledge books but if you want sense happy read one together with theme for entertaining for instance comic or novel. The Statistics for the Health Sciences: A Non-Mathematical Introduction is kind of e-book which is giving the reader unpredictable experience.

Myra Hackett:

What is your hobby? Have you heard that question when you got scholars? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as examining become their hobby. You must know that reading is very important and also book as to be the point. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update with regards to something by book. A substantial number of sorts of books that can you go onto be your object. One of them is niagra Statistics for the Health Sciences: A Non-Mathematical Introduction.
