Corrosion by Carbon and Nitrogen: Metal Dusting, Carburation and Nitridation (European Federation of Corrosion (EFC) Series) H Grabke, M Schütze

Metal dusting is a form of corrosion involving the disintegration of metals and alloys into a dust of graphite and metal particles when exposed to a carburizing atmosphere. This important book reviews the factors affecting metal dusting and how it can be prevented in sectors such as the chemical and petrochemical industries and in the direct reduction of iron ores. It also considers the related corrosion phenomena of carburization and nitridation.

After an introductory chapter setting out the key processes involved in metal dusting, the book reviews how this corrosion process affects a range of metals such as iron and steel, as well as nickel-based and chromium-based high-temperature alloys. There are chapters on the effects of particular gas mixtures on the corrosion process and on the use of coatings to prevent metal dusting. Processes involved in carburization and nitridation are also described and discussed.

With its distinguished editors and team of contributors, Corrosion by carbon and nitrogen is a valuable reference for all those concerned with understanding and preventing these corrosion processes in various industries.

- Reviews this corrosion process and how it affects the petrochemical and other industries
- Discusses the effect of particular gas mixtures on the corrosion process

From reader reviews:

Edward Kirklin:

Book will be written, printed, or created for everything. You can learn everything you want by a publication. Book has a different type. We all know that that book is important matter to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A reserve Corrosion by Carbon and Nitrogen: Metal Dusting, Carburisation and Nitridation (European Federation of Corrosion (EFC) Series) will make you to be smarter. You can feel more confidence if you can know about everything. But some of you think in which open or reading any book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you searching for best book or suitable book with you?

Ralph Humphries:

Many people spending their moment by playing outside together with friends, fun activity together with family or just watching TV the whole day. You can have new activity to invest your whole day by examining a book. Ugh, do you think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Mobile phone. Like Corrosion by Carbon and Nitrogen: Metal Dusting, Carburisation and Nitridation (European Federation of Corrosion (EFC) Series) which is obtaining the e-book version. So , try out this book? Let's see.

Amanda Garcia:

Is it anyone who having spare time then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Corrosion by Carbon and Nitrogen: Metal Dusting, Carburisation and Nitridation (European Federation of Corrosion (EFC) Series) can be the solution, oh how comes? A book you know. You are consequently out of date, spending your free time by reading in this fresh era is common not a nerd activity. So what these publications have than the others?

Jennifer Buster:

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that looking at is not important, boring and can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Corrosion by Carbon and Nitrogen: Metal Dusting, Carburisation and Nitridation (European Federation of Corrosion (EFC) Series) can make you really feel more interested to read.
