## **Why buy our paperbacks?**

1. Standard Font size of 10 for all books
2. High Quality Paper
3. Fulfilled by Amazon
4. Expedited shipping
5. 30 Days Money Back Guarantee

## **BEWARE OF LOW-QUALITY SELLERS**

Don't buy cheap paperbacks just to save a few dollars. Most of them use low-quality papers & binding. Their pages fall off easily. Some of them even use very small font size of 6 or less to increase their profit margin. It makes their books completely unreadable.

## **How is this book unique?**

1. Unabridged (100% Original content)
2. Font adjustments & biography included
3. Illustrated

## **About On The Origin Of Species by Charles Darwin**

On the Origin of Species, published on 24 November 1859, is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology. Its full title was On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life. In the 1872 sixth edition "On" was omitted, so the full title is The origin of species by means of natural selection, or the preservation of favoured races in the struggle for life. This edition is usually known as The Origin of Species. Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection. It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence, and experimentation.
