Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students Ricardo Simpson, Sudhir K Sastry

The goal of this textbook is to provide first-year engineering students with a firm grounding in the fundamentals of chemical and bioprocess engineering. However, instead of being a general overview of the two topics, Fundamentals of Chemical and Bioprocess Engineering will identify and focus on specific areas in which attaining a solid competency is desired. This strategy is the direct result of studies showing that broad-based courses at the freshman level often leave students grappling with a lot of material, which results in a low rate of retention. Specifically, strong emphasis will be placed on the topic of material balances, with the intent that students exiting a course based upon this textbook will be significantly higher on Bloom's Taxonomy (knowledge, comprehension, application, analysis and synthesis, evaluation, creation) relating to material balances. In addition, this book will also provide students with a highly developed ability to analyze problems from the material balances perspective, which will leave them with important skills for the future. The textbook will consist of numerous exercises and their solutions. Problems will be classified by their level of difficulty. Each chapter will have references and selected web pages to vividly illustrate each example. In addition, to engage students and increase their comprehension and rate of retention, many examples will involve real-world situations.

From reader reviews:

Sandra Conaway:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each book has different aim or goal; it means that guide has different type. Some people sense enjoy to spend their time and energy to read a book. These are reading whatever they take because their hobby is reading a book. How about the person who don't like studying a book? Sometime, person feel need book whenever they found difficult problem or even exercise. Well, probably you will require this Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students.

Victor Loy:

Reading can called thoughts hangout, why? Because when you find yourself reading a book mainly book entitled Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students your brain will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely will become your mind friends. Imaging each and every word written in a book then become one type conclusion and explanation this maybe you never get previous to. The Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students giving you an additional experience more than blown away the mind but also giving you useful details for your better life with this era. So now let us present to you the relaxing pattern this is your body and mind will be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary shelling out spare time activity?

Carl Brinkley:

Do you have something that you want such as book? The reserve lovers usually prefer to pick book like comic, short story and the biggest one is novel. Now, why not attempting Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students that give your pleasure preference will be satisfied through reading this book. Reading habit all over the world can be said as the method for people to know world better then how they react toward the world. It can't be stated constantly that reading habit only for the geeky individual but for all of you who wants to always be success person. So , for all of you who want to start looking at as your good habit, you may pick Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students become your current starter.

Walter Pyle:

This Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year Students is great e-book for you because the content which can be full of information for you who always deal with world and have to make decision every minute. This kind of book reveal it info accurately using great coordinate word or we can say no rambling sentences within it. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but challenging core information with beautiful delivering sentences. Having Chemical and Bioprocess Engineering: Fundamental Concepts for First-Year

Students in your hand like having the world in your arm, info in it is not ridiculous one particular. We can say that no guide that offer you world inside ten or fifteen second right but this book already do that. So , this is good reading book. Hi Mr. and Mrs. occupied do you still doubt in which?
