Concepts in Modern Biology David Kraus

This easy-to-use text has been noted for its clarity and comprehensive, up-to-date content. Featuring high-interest illustrations, photographs, diagrams, and charts and tables, this program focuses on the major content areas of biology - human biology, comparative biology, genetics, and molecular biology.

Here is everything you need to create a complete biology program, including:

- The text is conveniently divided into basic core sections and extended sections, with recently updated content in every unit.
- Laboratory skills and activities are integrated into the text and reinforced in the Skills Appendix.
- Key terms and concepts are italicized and defined in context to help students master essential science vocabulary.
- Numerous illustrations, photographs, diagrams, and charts and tables visually organize and clarify concepts.
- Reproducible masters of text illustrations for student labeling and for use with an overhead projector.
- Reasoning questions midway through lengthier chapters reinforce critical-thinking skills.
- Practical teaching suggestions and Answer Keys.
- Diagram interpretation questions to help students prepare for important exams.
- Critical thinking questions and motivational discussion questions to correlated to text illustrations and diagrams.
- Comprehensive end-of-chapter tests - feature completion, multiple-choice, and reasoning questions - help students prepare for their state tests and their college entrance exams.
