Immunology (Fundamentals of Biomedical Science)

Angela Hall, Christine Yates

Immunology (Fundamentals of Biomedical Science) Angela Hall, Christine Yates

Biomedical scientists are the foundation of modern healthcare, from cancer screening to diagnosing HIV, from blood transfusion for surgery to food poisoning and infection control. Without biomedical scientists, the diagnosis of disease, the evaluation of the effectiveness of treatment, and research into the causes and cures of disease would not be possible. The Fundamentals of Biomedical Science series is written to reflect the challenges of practicing biomedical science today. It draws together essential basic science with insights into laboratory practice to show how an understanding of the biology of disease is coupled to the analytical approaches that lead to diagnosis. Assuming only a minimum of prior knowledge, the series reviews the full range of disciplines to which a Biomedical Scientist may be exposed - from microbiology to cytopathology to transfusion science. Alongside volumes exploring specific biomedical themes and related laboratory diagnosis, an overarching Biomedical Science Practice volume gives a grounding in the professional and experimental skills with which any Biomedical Scientist must be equipped. The series:

- Understands the complex roles of Biomedical Scientists in the modern practice of medicine.
- Understands the development needs of employers and the Profession.
- Addresses the need for understanding of a range of fundamental sciences in the context of Biomedicine.
- Places the theoretical aspects of Biomedical Science in their practical context.

The series is developed in partnership with and endorsed by the Institute of Biomedical Science. See ibms.org for more information. Immunology gives the new biomedical scientist an insight into the function of the immune system, the front line of defence against pathological disease, and the diagnostic techniques used to identify associated malfunctions and disorders. By examining the key immunological principles and scientific basis of laboratory techniques with a focus on the biomedical scientists role in the diagnostic laboratory, the reader is provided with everything needed to prepare for a specialist qualification in immunology. Current tests, the rationale behind their use, the technologies employed, and the quality measures applied are illustrated by specific case studies showing how the clinician interprets the results to help the patient.

Online Resource Centre

The Online Resource Centre to accompany Immunology features:

- For registered adopters of the book:
 - Figures from the book, available to download
- For students:
 - An interactive Digital Microscope, encouraging the exploration of tissue samples
 - Self-assessment modules to help you to check and reinforce understanding of the basic science introduced in each volume
 - Video podcasts including interviews with practicing biomedical scientists, and in the lab footage showing biomedical science in practice

From reader reviews:

Nola Schroeder:

Have you spare time for just a day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a move, shopping, or went to often the Mall. How about open or perhaps read a book entitled Immunology (Fundamentals of Biomedical Science)? Maybe it is for being best activity for you. You understand beside you can spend your time with the favorite's book, you can better than before. Do you agree with its opinion or you have different opinion?

Michelle Han:

Reading a publication tends to be new life style on this era globalization. With reading you can get a lot of information that will give you benefit in your life. Along with book everyone in this world may share their idea. Books can also inspire a lot of people. Plenty of author can inspire all their reader with their story or maybe their experience. Not only the storyplot that share in the textbooks. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors these days always try to improve their ability in writing, they also doing some exploration before they write for their book. One of them is this Immunology (Fundamentals of Biomedical Science).

Adriana Phillips:

Playing with family in the park, coming to see the sea world or hanging out with close friends is thing that usually you will have done when you have spare time, subsequently why you don't try matter that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Immunology (Fundamentals of Biomedical Science), you could enjoy both. It is very good combination right, you still desire to miss it? What kind of hangout type is it? Oh can happen its mind hangout men. What? Still don't get it, oh come on its called reading friends.

Chris Moore:

Is it anyone who having spare time after that spend it whole day through watching television programs or just lying on the bed? Do you need something new? This Immunology (Fundamentals of Biomedical Science) can be the respond to, oh how comes? It's a book you know. You are therefore out of date, spending your time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?
