Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation)

Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation)

Cognitive deficits are a common consequence of neurological disease, and there is evidence that specific cognitive training may be effective in rehabilitation. Behavioural dysfunction following neurological disease constitutes one of the major causes of disability worldwide, exerts a major impact on the daily life of affected individuals, and their families, also with a financial burden both for patients, and the society in general. Therefore, the adequate treatment of cognitive dysfunction is a much relevant issue, with social and economical implications, over and above the neuropsychological problem per se.

Several investigations emphasise the fact that interacting with neural activity, by means of cortical stimulation, can affect cognitive performance. A number of studies have reported enhanced performance in specific cognitive tasks in patients with several types of neurological disease, after receiving Non Invasive Brain Stimulation (NIBS) to specific cortical areas, namely: Transcranial Magnetic Stimulation, and transcranial Electrical Stimulation. In general, the evidence highlights the possibility of inducing changes in cortical excitability, which, in turn, may lead to a plastic reorganization of dysfunctional networks, responsible for the impaired cognitive functions. Despite these advances, a number of important questions remain open, regarding the use of stimulation techniques in cognitive rehabilitation.

This special issue puts together international leading experts in the field, to review and discuss recent advances as to whether NIBS techniques alone, or combined with behavioural cognitive rehabilitation, can lead to performance enhancements, and why. The issue is timely and promises to have a huge impact across many domains of clinical and basic neuroscience.

From reader reviews:

Maria Blanco:

The particular book Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation) will bring that you the new experience of reading a book. The author style to clarify the idea is very unique. When you try to find new book to study, this book very suited to you. The book Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation) is much recommended to you to learn. You can also get the e-book from your official web site, so you can more easily to read the book.

Barbara Jackson:

Reading a e-book tends to be new life style on this era globalization. With examining you can get a lot of information which will give you benefit in your life. Using book everyone in this world can easily share their idea. Publications can also inspire a lot of people. A great deal of author can inspire all their reader with their story or their experience. Not only the storyline that share in the guides. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their skill in writing, they also doing some investigation before they write with their book. One of them is this Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation).

Steve Franklin:

Beside this kind of Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation) in your phone, it can give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh in the oven so don't always be worry if you feel like an previous people live in narrow town. It is good thing to have Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation) because this book offers to you readable information. Do you at times have book but you rarely get what it's exactly about. Oh come on, that would not happen if you have this in your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss the idea? Find this book and also read it from currently!

Erik Figaro:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that looking at is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit

your needs. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Non-Invasive Brain Stimulation: New Prospects in Cognitive Neurorehabilitation (Special Issues of Neuropsychological Rehabilitation) can make you experience more interested to read.
