LearnSmart is an intelligent learning system that uses a series of probing questions to pinpoint each student's knowledge gaps. LearnSmart strengthens student understanding and retention of your course's fundamental concepts; effectively preparing your students for class so you can review less and teach more. The LearnSmart methodology is simple: determine the concepts students don't know or understand, and then teach those concepts using personalized plans designed for each student's success.

SmartBook is the first and only adaptive reading experience available for the higher education market. Powered by an intelligent diagnostic and adaptive engine, SmartBook facilitates the reading process by identifying what content a student knows and doesn't know through adaptive assessments. As the student reads, the reading material constantly adapts to ensure the student is focused on the content he or she needs the most to close any knowledge gaps.

Thoroughly Refreshed Problem Set in the eleventh Edition. 70% of the problems are updated from the previous edition.

Concept Questions are multiple choice problems that require few, if any, calculations are included. Students are encouraged to solve these problems using the principles and techniques discussed in the text and to use these principles to help develop their intuition.
