Child Development for Child Care and Protection Workers: Second Edition Brigid Daniel, Sally Wassell, Robbie Gilligan

Child Development for Child Care and Protection Workers is a classic text for students and practitioners in the child care and protection field which summarises important current thinking on child development and applies it directly to practice.

The book covers key issues such as resilience and vulnerability and the impact of protective or adverse environments. Different stages of development (infancy, school age and adolescence) are discussed, and attachment theory is used to offer insights into the impact of abuse and neglect on development. A key feature is the inclusion of case studies and activities to allow the reader to improve their understanding and reflect on good practice. This second edition is fully updated to reflect the new policy context and multi-disciplinary practice, and contains updated practice examples to take into account contemporary issues affecting children and young people.

This book encourages practitioners to consider each child as an individual with unique circumstances, and links theory and practice in an imaginative and sympathetic way. It will be essential reading for all child care and protection workers.
