Repeat Photography: Methods and Applications in the Natural Sciences

Robert H. Webb

Repeat Photography: Methods and Applications in the Natural Sciences Robert H. Webb

First developed in the 1880s as a way to monitor glaciers in Europe, repeat photography—the practice of taking photographs at different points in times from the same physical vantage point—remains an essential and cost-effective technique for scientists and researchers working to track and study landscape change.

This volume explores the technical and geographic scope of this important technique, focusing particularly on the intertwined influences of climatic variation and land-use practices in sculpting landscapes.

Contributors offer a broad-perspective review of the state-of-the-art of repeat photography, with twenty-three chapters written by researchers around the globe who have made use of repeat photography in their work.

Topics addressed include

the history of repeat photography

techniques for creating and analyzing repeat photographs

applications in the geosciences

applications in population ecology

applications in ecosystem change

cultural applications

Repeat Photography demonstrates the wide range of potential applications, examines new techniques for acquiring data from repeat photography, and clearly shows that repeat photography remains a valuable and efficient means of monitoring change in both developed and developing regions. Over one hundred sets of photographs, including thirty-two pages of color photos, serve as examples.

Recent concerns about climate change and its effects on natural landscapes, combined with ongoing concerns about land-use practices, make this state-of-the-art review a timely contribution to the literature.

From reader reviews:

Ismael Soliz:

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a publication. Book has a different type. To be sure that book is important point to bring us around the world. Close to that you can your reading skill was fluently. A e-book Repeat Photography: Methods and Applications in the Natural Sciences will make you to possibly be smarter. You can feel more confidence if you can know about anything. But some of you think which open or reading the book make you bored. It is not make you fun. Why they could be thought like that? Have you searching for best book or suitable book with you?

Kathleen Carroll:

Book is to be different per grade. Book for children right up until adult are different content. We all know that that book is very important for people. The book Repeat Photography: Methods and Applications in the Natural Sciences has been making you to know about other expertise and of course you can take more information. It is very advantages for you. The reserve Repeat Photography: Methods and Applications in the Natural Sciences is not only giving you much more new information but also to get your friend when you really feel bored. You can spend your current spend time to read your guide. Try to make relationship while using book Repeat Photography: Methods and Applications in the Natural Sciences. You never sense lose out for everything should you read some books.

Dwight Richardson:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their sparetime with their family, or their very own friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Could possibly be reading a book could be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to try out look for book, may be the reserve untitled Repeat Photography: Methods and Applications in the Natural Sciences can be excellent book to read. May be it could be best activity to you.

Richard Manning:

Do you really one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you never know the inside because don't assess book by its cover may doesn't work is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer can be Repeat Photography: Methods and Applications in the Natural Sciences why because the excellent cover that make you consider about the content will not disappoint anyone. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.
