The Social Unconscious in Persons, Groups and Societies: Mainly Theory: 1 (The New International Library of Group Analysis) Earl Hopper

The social unconscious is vital for understanding persons and their groupings, ranging from families to societies, committees to organisations, and from small to median to large therapeutic groups, and essential for comprehensive clinical work. This series of volumes of contributions from an international network of psychoanalysts, analytical psychologists, group analysts and psychodramatists draw on the classical ideas of Freud, Klein and Jung, Bion, Foulkes and Moreno, and on contemporary relational perspectives, self-psychology and neuroscience. Volume I is concerned mainly with the theory of the social unconscious. It is focused on topics such as location, sociality, the social brain, identity, ideology, the foundation matrix, social psychological retreats, false collective self-objects, the collective unconscious and its archetypes and social dreaming.
