The lightweight treated soil method (LWTS) is a newly developed construction technique within the area of coastal soft ground engineering. In this groundbreaking book, experts Tsuchida and Egashira demonstrate that by using the LWTS method in a soft ground area, the consolidation settlement and the gravity impact of heavy structures can directly be decreased. Based on extensive research and experience, the text offers expert information for dealing with soft ground in the areas of geotechnical and construction engineering. The properties, design and construction techniques of the LWTS method are treated and a number of case studies is presented to illustrate this method in practice.
