France Since 1870: Culture, Politics and Society Charles Sowerwine

This fascinating, authoritative history describes the great political, economic, cultural, and social events that have defined the period, from the convulsive establishment of a French republic to the apotheosis of French national culture in World War I, from the acrimonious failure of the 1930s and the Occupation to France's resurgence as a central focus of postwar Europe. The book ends with President Mitterand's retirement, an epochal event that marked the severing of France's last link with the Vichy government and the Fourth Republic.
