## Football and Migration: Perspectives, Places, Players (Routledge Research in Sport, Culture and Society)

Football is an incredibly powerful case study of globalization and an extremely useful lens through which to study and understand contemporary processes of international migration. This is the first book to focus on the increasingly complex series of migratory processes that contour the contemporary game, drawing on multi-disciplinary approaches from sociology, history, geography and anthropology to explore migration in football in established, emerging and transitional contexts.

The book examines shifting migration patterns over time and across space, and analyses the sociological dynamics that drive and influence those patterns. It presents in-depth case studies of migration in elite men's football, exploring the role of established leagues in Europe and South America as well as important emerging leagues on football's frontier in North America and Asia. The final section of the book analyses the movement of groups who have rarely been the focus of migration research before, including female professional players, elite youth players, amateur players and players' families, drawing on important new research in Ghana, England, Haiti and the Dominican Republic.

Few other sports have such a global reach and therefore few other sports are such an important location for cross-cultural research and insight across the social sciences. This book is engaging reading for any student or scholar with an interest in sport, sociology, human geography, migration, international labour flows, globalization, development or post-colonial studies.
