Heterogeneous Cellular Networks

Heterogeneous Cellular Networks

A timely publication providing coverage of radio resource management, mobility management and standardization in heterogeneous cellular networks

The topic of heterogeneous cellular networks has gained momentum in industry and the research community, attracting the attention of standardization bodies such as 3GPP LTE and IEEE 802.16j, whose objectives are looking into increasing the capacity and coverage of the cellular networks. This book focuses on recent progresses, covering the related topics including scenarios of heterogeneous network deployment, interference management in the heterogeneous network deployment, carrier aggregation in a heterogeneous network, cognitive radio, cell selection/reselection and load balancing, mobility and handover management, capacity and coverage optimization for heterogeneous networks, traffic management and congestion control.

This book enables readers to better understand the technical details and performance gains that are made possible by this state-of-the-art technology. It contains the information necessary for researchers and engineers wishing to build and deploy highly efficient wireless networks themselves. To enhance this practical understanding, the book is structured to systematically lead the reader through a series of case-studies of real world scenarios.

Key features:

- Presents this new paradigm in cellular network domain: a heterogeneous network containing network nodes with different characteristics such as transmission power and RF coverage area
- Provides a clear approach by containing tables, illustrations, industry case studies, tutorials and examples to cover the related topics
- Includes new research results and state-of-the-art technological developments and implementation issues

From reader reviews:

Julio Yates:

Have you spare time for any day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a walk, shopping, or went to the actual Mall. How about open or read a book titled Heterogeneous Cellular Networks? Maybe it is being best activity for you. You know beside you can spend your time along with your favorite's book, you can better than before. Do you agree with their opinion or you have other opinion?

Brian Griffith:

Book is to be different per grade. Book for children until eventually adult are different content. As you may know that book is very important for all of us. The book Heterogeneous Cellular Networks was making you to know about other understanding and of course you can take more information. It is rather advantages for you. The e-book Heterogeneous Cellular Networks is not only giving you more new information but also to be your friend when you sense bored. You can spend your own personal spend time to read your guide. Try to make relationship with all the book Heterogeneous Cellular Networks. You never experience lose out for everything in case you read some books.

Michael Turner:

A lot of people always spent all their free time to vacation or maybe go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read any book. It is really fun for yourself. If you enjoy the book that you read you can spent 24 hours a day to reading a guide. The book Heterogeneous Cellular Networks it is very good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. Should you did not have enough space to develop this book you can buy typically the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not too costly but this book provides high quality.

Rayford Alexander:

Your reading 6th sense will not betray you actually, why because this Heterogeneous Cellular Networks publication written by well-known writer who knows well how to make book which might be understand by anyone who else read the book. Written in good manner for you, leaking every ideas and composing skill only for eliminate your own personal hunger then you still hesitation Heterogeneous Cellular Networks as good book not merely by the cover but also by the content. This is one reserve that can break don't ascertain book by its include, so do you still needing one more sixth sense to pick this kind of!/? Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.
