The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) Kelly E. Happe

Winner of the 2014 Diamond Anniversary Book Award

Finalist for the 2014 National Communications Association Critical and Cultural Studies Division Book of the Year Award

In 2000, the National Human Genome Research Institute announced the completion of a “draft” of the human genome, the sequence information of nearly all 3 billion base pairs of DNA. Since then, interest in the hereditary basis of disease has increased considerably. In *The Material Gene*, Kelly E. Happe considers the broad implications of this development by treating “heredity” as both a scientific and political concept. Beginning with the argument that eugenics was an ideological project that recast the problems of industrialization as pathologies of gender, race, and class, the book traces the legacy of this ideology in contemporary practices of genomics. Delving into the discrete and often obscure epistemologies and discursive practices of genomic scientists, Happe maps the ways in which the hereditarian body, one that is also normatively gendered and racialized, is the new site whereby economic injustice, environmental pollution, racism, and sexism are implicitly reinterpreted as pathologies of genes and by extension, the bodies they inhabit. Comparing genomic approaches to medicine and public health with discourses of epidemiology, social movements, and humanistic theories of the body and society, *The Material Gene* reworks our common assumption of what might count as effective, just, and socially transformative notions of health and disease.

From reader reviews:

Roberta Petty:

This The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) book is simply not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book will be information inside this book incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This particular The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) without we realize teach the one who examining it become critical in pondering and analyzing. Don't be worry The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) can bring once you are and not make your handbag space or bookshelves' come to be full because you can have it with your lovely laptop even phone. This The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) having fine arrangement in word along with layout, so you will not truly feel uninterested in reading.

Joseph Curtis:

Reading a publication tends to be new life style in this particular era globalization. With reading you can get a lot of information that may give you benefit in your life. Using book everyone in this world may share their idea. Guides can also inspire a lot of people. Plenty of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about the ability about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their skill in writing, they also doing some research before they write with their book. One of them is this The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics).

Andrew Martin:

Your reading 6th sense will not betray anyone, why because this The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) book written by well-known writer who really knows well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and writing skill only for eliminate your personal hunger then you still doubt The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) as good book not merely by the cover but also through the content. This is one book that can break don't judge book by its deal with, so do you still needing yet another sixth sense to pick that!? Oh come on your examining sixth sense already told you so why you have to listening to yet another sixth sense.

Marcella Cook:

Are you kind of hectic person, only have 10 or even 15 minute in your day to upgrading your mind talent or thinking skill actually analytical thinking? Then you are having problem with the book compared to can satisfy your small amount of time to read it because this time you only find book that need more time to be

go through. The Material Gene: Gender, Race, and Heredity after the Human Genome Project (Biopolitics) can be your answer since it can be read by anyone who have those short time problems.
