Topographie cornéenne (French Edition)

Damien Gatinel

Topographie cornéenne (French Edition) Damien Gatinel

La topographie cornéenne correspond à la représentation graphique, sous forme d'une carte, de certaines propriétés géométriques de la cornée (courbure, élévation, épaisseur). Cette technique de mesure est essentielle dans le diagnostic des maladies cornéennes et la mise au point de méthodes de correction de la vision. L'avènement et le développement de la chirurgie réfractive ont rendu la topographie cornéenne indispensable à la mise en place de la stratégie diagnostique et thérapeutique. Elle s'impose désormais avant toute chirurgie réfractive, et complète utilement le bilan préopératoire en chirurgie de la cataracte et du segment antérieur de l'œil.

Cet ouvrage, **le premier sur le sujet**, expose dans un premier temps les éléments nécessaires à la bonne compréhension de la technique : **terminologie, principes optiques, instruments, bases physiques**. La seconde partie **analyse des cartes topographiques cornéennes** telles qu'elles sont utilisées en pratique courante : il s'agit de cartes typiques interprétées qui permettent au lecteur de répondre à **l'essentiel des situations cliniques**. Les notions relatives au **dépistage du kératocône infra clinique** (prévention de l'ectasie post LASIK) ainsi que la **mesure du pouvoir optique de la cornée** (calcul biométrique après chirurgie réfractive) ont été particulièrement développées.

Cet ouvrage constitue un outil de formation indispensable aux ophtalmologistes, orthoptistes et opticiens. **Le premier livre sur la topographie cornéenne**

- Les éléments nécessaires à la bonne compréhension de la technique : **terminologie, principes optiques, instruments, bases physiques**.
- L'**analyse des cartes topographiques cornéennes** telles qu'elles sont utilisées en pratique courante pour répondre à **l'essentiel des situations cliniques**.
- Les notions relatives au **dépistage du kératocône infra clinique** (prévention de l'ectasie post LASIK) et la **mesure du pouvoir optique de la cornée** (calcul biométrique après chirurgie réfractive).
