P. Lionello

Chapter 007, Modeling of the Mediterranean Climate System P. Lionello

NOTE: This is a single chapter excerpted from the book *The Climate of the Mediterranean Region*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

The Mediterranean region contains a diverse and interesting climate ranging from areas with permanent glaciers to areas of subtropical, semiarid regions. The region is potentially sensitive to climate change and its progress has environmental, social, and economic implications within and beyond the region. Produced by the Mediterranean Climate Variability and Predictability Research Networking Project, this book reviews the evolution of the Mediterranean climate over the past two millennia with projections further into the twenty-first century as well as examining in detail various aspects of the Mediterranean region's climate including evolution, atmospheric variables, and oceanic and land elements. Integrated with this, the book also considers the social and economic problems or vulnerabilities associated with the region. Written and reviewed by multiple researchers to ensure a high level of information presented clearly, Mediterranean Climate Variables will be an invaluable source of information for geologists, oceanographers, and anyone interested in learning more about the Mediterranean climate.

- Written by leading experts in the field
- Presents clear, compelling, and concise evidence
- Includes the latest thinking in Mediterranean climate research
