Constructing a Social Welfare System for All in China (Routledge Studies on the Chinese Economy)

China Development Research Foundation

China Development Research Foundation is one of the leading economic think tanks in China, where many of the details of China's economic reform have been formulated. Its work and publications therefore provide great insights into what the Chinese themselves think about economic reform and how it should develop. This book sets out the general objectives, principles and framework of a proposed new social welfare system for China, putting forward relevant policy recommendations. It provides a comprehensive overview of China's current welfare services, including retirement pensions, education, health, employment, housing and social security payments, and goes on to cost the proposed new social welfare system and assess the government's capacity for implementing it. It shows how the new system will, within an integrated framework, provide comprehensive welfare for all, including rural and urban citizens, migrant workers and disadvantaged groups such as rural and urban poor. It also shows how the new system will aim to balance economic and social development whilst maintaining China's high economic growth rate, increasing domestic demand and promoting economic restructuring.
