## **Structural Health Monitoring: with Piezoelectric Wafer Active Sensors** Victor Giurgiutiu

Structural Health Monitoring (SHM) is the interdisciplinary engineering field devoted to the monitoring and assessment of structural health and durability. SHM technology integrates remote sensing, smart materials, and computer based knowledge systems to allow engineers see how built up structures are performing over time. It is particularly useful for remotely monitoring large infrastructure systems, such as bridges and dams, and high profile mechanical systems such as aircraft, spacecraft, ships, offshore structures and pipelines where performance is critical but onsite monitoring is difficult or even impossible. Structural Health Monitoring with Piezoelectric Wafer Active Sensors is the first comprehensive textbook to provide background information, theoretical modeling, and experimental examples on the principal technologies involved in SHM.

This textbook can be used for both teaching and research. It not only provides students, engineers and other interested technical specialists with the foundational knowledge and necessary tools for understanding modern sensing materials and systems, but also shows them how to employ this knowledge in actual engineering situations.

- Addresses the problem of aging structures and explains how SHM can alleviate their situation and prolong their useful life.
- Provides a step by step presentation on how Piezoelectric Wafer Active Sensors (PWAS) are used to detect and quantify the presence of damage in structures.
- Presents the underlying theories (piezoelectricity, vibration, wave propagation, etc.) and experimental techniques (E/M impedance, PWAS phased arrays, etc.) to be employed in successful SHM applications.
- Provides an understanding of how to interpret sensor signal patterns such as various wave forms, including analytical techniques like Fast Fourier Transform, Short-time Fourier Transform and Wavelet Transform.
- Offers comprehensive teaching tools (worked examples, experiments, homework problems, and exercises) and an extensive online instructor manual containing lecture plans and homework solutions.

### **From reader reviews:**

#### **Wanda Matthews:**

The book Structural Health Monitoring: with Piezoelectric Wafer Active Sensors give you a sense of feeling enjoy for your spare time. You should use to make your capable far more increase. Book can to get your best friend when you getting anxiety or having big problem with your subject. If you can make looking at a book Structural Health Monitoring: with Piezoelectric Wafer Active Sensors to become your habit, you can get considerably more advantages, like add your own capable, increase your knowledge about a number of or all subjects. You could know everything if you like start and read a reserve Structural Health Monitoring: with Piezoelectric Wafer Active Sensors. Kinds of book are several. It means that, science e-book or encyclopedia or other folks. So , how do you think about this publication?

#### **Diana Castillo:**

Reading a reserve can be one of a lot of task that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a book will give you a lot of new data. When you read a publication you will get new information since book is one of a number of ways to share the information or even their idea. Second, looking at a book will make you more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other people. When you read this Structural Health Monitoring: with Piezoelectric Wafer Active Sensors, you could tells your family, friends and also soon about yours publication. Your knowledge can inspire average, make them reading a book.

#### **Shannon Grant:**

Many people spending their moment by playing outside along with friends, fun activity having family or just watching TV all day long. You can have new activity to shell out your whole day by studying a book. Ugh, do you think reading a book will surely hard because you have to bring the book everywhere? It ok you can have the e-book, having everywhere you want in your Mobile phone. Like Structural Health Monitoring: with Piezoelectric Wafer Active Sensors which is getting the e-book version. So , try out this book? Let's view.

#### **Jeff Sanchez:**

That guide can make you to feel relax. This kind of book Structural Health Monitoring: with Piezoelectric Wafer Active Sensors was colourful and of course has pictures around. As we know that book Structural Health Monitoring: with Piezoelectric Wafer Active Sensors has many kinds or genre. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book usually are make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that.
