Introduction to Non-Euclidean Geometry EISENREICH

An Introduction to Non-Euclidean Geometry covers some introductory topics related to non-Euclidian geometry, including hyperbolic and elliptic geometries.

This book is organized into three parts encompassing eight chapters. The first part provides mathematical proofs of Euclid's fifth postulate concerning the extent of a straight line and the theory of parallels. The second part describes some problems in hyperbolic geometry, such as cases of parallels with and without a common perpendicular. This part also deals with horocycles and triangle relations. The third part examines single and double elliptic geometries. This book will be of great value to mathematics, liberal arts, and philosophy major students.

From reader reviews:

Cassie Merritt:

In this 21st one hundred year, people become competitive in each way. By being competitive right now, people have do something to make all of them survives, being in the middle of the actual crowded place and notice through surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yep, by reading a book your ability to survive boost then having chance to stand than other is high. For yourself who want to start reading a book, we give you this Introduction to Non-Euclidean Geometry book as beginner and daily reading publication. Why, because this book is greater than just a book.

Jeremy Reed:

The e-book with title Introduction to Non-Euclidean Geometry contains a lot of information that you can find out it. You can get a lot of profit after read this book. This particular book exist new expertise the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This kind of book will bring you throughout new era of the globalization. You can read the e-book on your smart phone, so you can read the item anywhere you want.

Patricia Sax:

Do you like reading a book? Confuse to looking for your selected book? Or your book was rare? Why so many question for the book? But any people feel that they enjoy to get reading. Some people likes reading through, not only science book but in addition novel and Introduction to Non-Euclidean Geometry as well as others sources were given knowledge for you. After you know how the good a book, you feel need to read more and more. Science book was created for teacher or perhaps students especially. Those guides are helping them to put their knowledge. In other case, beside science book, any other book likes Introduction to Non-Euclidean Geometry to make your spare time far more colorful. Many types of book like here.

Joseph Mesta:

Reading a publication make you to get more knowledge from it. You can take knowledge and information from a book. Book is published or printed or highlighted from each source in which filled update of news. Within this modern era like now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just searching for the Introduction to Non-Euclidean Geometry when you desired it?
