Classics in Hydrocarbon Chemistry: Syntheses, Concepts, Perspectives Henning Hopf

Carbon and Hydrogen: the two basic building units can be combined in a million different ways to give a plethora of fascinating organic compounds. Henning Hopf presents not only the most remarkable structures and properties of hydrocarbon compounds but shows in a clear presentation and with great didactic skill how molecules like tetrahedrane, superphane or dodecahedrane challenge the synthetic skills of every organic chemist. To make the information more accessible, especially to the novice, the author carefully analyzes the synthetic problem and explains each synthetic step and gives hints on alternative methods and potential pitfalls. Numerous references to useful reviews and the original literature make this book an indispensable source of further information. Special emphasis is placed on the skillful use of graphics and schemes: Synthetic (retro)analyses, reaction sequences, and crucial steps are presented in boxed sections within the text. Graduate students and researchers alike will find this book a gold mine of useful information essential for their daily work. Every organic chemist will want to have a copy on his or her desk.

With a foreword by W. von Eggers Doering

From reader reviews:

Debbie Brown:

What do you about book? It is not important with you? Or just adding material when you really need something to explain what you problem? How about your time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everyone has many questions above. They have to answer that question because just their can do in which. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need this particular Classics in Hydrocarbon Chemistry: Syntheses, Concepts, Perspectives to read.

Blanche Dobos:

In this 21st one hundred year, people become competitive in every way. By being competitive today, people have do something to make these individuals survives, being in the middle of the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yep, by reading a book your ability to survive improve then having chance to stand than other is high. For you who want to start reading any book, we give you this particular Classics in Hydrocarbon Chemistry: Syntheses, Concepts, Perspectives book as beginning and daily reading guide. Why, because this book is greater than just a book.

Robert Lyman:

As people who live in often the modest era should be revise about what going on or information even knowledge to make these keep up with the era and that is always change and advance. Some of you maybe will probably update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know what one you should start with. This Classics in Hydrocarbon Chemistry: Syntheses, Concepts, Perspectives is our recommendation to cause you to keep up with the world. Why, because book serves what you want and need in this era.

Silvia Doucet:

The reason why? Because this Classics in Hydrocarbon Chemistry: Syntheses, Concepts, Perspectives is an unordinary book that the inside of the guide waiting for you to snap this but latter it will distress you with the secret it inside. Reading this book beside it was fantastic author who else write the book in such wonderful way makes the content inside of easier to understand, entertaining means but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This book will give you a lot of advantages than the other book include such as help improving your talent and your critical thinking method. So , still want to hold off having that book? If I ended up you I will go to the publication store hurriedly.
